PROJECTS

Simple Poetry Website

July 2021 - July 2021

Built a Simple poetry website that enables the users, majorly students with artistic passion to put into writing their experiences and feelings. It has been developed using php.

Land Information System

July 2022- current

Built a machine learning project that aims to making the land information to be accessible all in one place. It also brings out a user-friendly interface where most things are done through machine learning hence reduces the collection of a lot of data from the user. It has been developed using php and css. This is still work in progress, with the aim of making it better and more scalable.
